

RUST VETO® 4207

Water Displacing Rust Preventive

DESCRIPTION

RUST VETO 4207 utilizes special polar compounds held up in petroleum solvent, such that wet components to be treated for rust protection can simply be immersed; the moisture is displaced leaving a residual rust preventive film following evaporation of solvent.

RUST VETO 4207 is particularly effective where there is alkaline, acid or solvent emulsion rinse water left on components to be treated.

RUST VETO 4207 releases displaced water at an extremely rapid rate and leave a very thin, transparent protective film.

RUST VETO 4207 is particularly suited to protect ferrous surfaces from rust. It displaces water on parts which have been cleaned in alkaline cleaners such as CERFA KLEEN 5397. After the wash rinse the cleaned parts are dipped in **RUST VETO 4207**. A thin film deposited will give protection under normal conditions, indoors, for 2 - 3 months.

FEATURES

- Displaces water
- Excellent coverage reduces cost
- Compatible with lubricants
- Safe for most bi-metals, can be used safely with many combinations of ferrous or non-ferrous metals and alloys
- Easy to remove
- Its affinity for metal adheres the film to the surface—handling won't wipe it off.

TYPICAL VALUES

Product Appearance	Dark Brown Fluid
Density @15°C	0.801 kg/L
Flash Point (COC)	38°C
Film Thickness	2.3 micron
Salt Spray	2 - 5 Days
Indoor Protection	3 months
Shed Protection	2 months
100% Humidity Test @ 40°C	> 30 days

HEALTH AND SAFETY

Refer to MSDS for proper handling and disposal. Please note that the MSDS includes handling, health and disposal information which should be passed on to your employees, and to anyone else who comes in contact with our product. Additional advice can also be obtained from your local Houghton representative.

NOTE: Read and understand all precautions on container labels before using this product.

RUST VETO® 4207

Water Displacing Rust Preventive

REFERENCES

RUST VETO 4207 is widely used by electro platers where rust protection of finished good is required. It is widely used in component manufactures between operations where a newly machined surface is to be protected.

HOW TO USE

RUST VETO 4207 is used neat, as supplied, from the drum. Apply by dip, spray or brush between 5°C and 35°C. The film is easily removed by solvent degreaser or an alkaline cleaner.

RUST VETO 4207 is a real multi-purpose product. Use it across the board for indoor protection of critical surfaces or for packaged materials. Examples are hardware, bell bearings dies, tools, fixtures, gauges, polished goal, phosphatised surfaces and idle or stored machinery.

SHELFLIFE & AVAILABILITY

Under normal conditions the recommended shelf life for **RUST VETO 4207** is a minimum of Twenty Four (24) months, unless otherwise specified.

RUST VETO 4207 is available in Pail, Drum or Tote. Other sizes may be available upon request , please contact your Houghton sales representative.
